## IEG PI NOTICE

No. 54-76

## TITLE/SIGNIFICANCE:

Converted Minsk SAM Site B28-2 to Minsk SAM Site B28-5.

## COMMENT:

This SA-2 conversion to an SA-5 SAM site is different from earlier converted sites. The SA-2 site physically separates the SA-5 launch area from the tracking and guidance facility. The purpose of this conversion was to improve the intercept capability of the strategically located SAM site. Also, the Soviets were able to utilize existing support facilities.
